THE NEW MAGNIFYING MIRROR

This Swedish invention is an every day aid that helps you get a closer and sharp look in the mirror - particularly if you are long-sighted or wear reading glasses (presbyopian). Thanks to the level surface it will easily attach almost anywhere in your bathroom; on a tile wall or on the bathroom mirror, for example. With the new magnifying mirror you will easily find yourself in the right distance for grooming - with visual aquity and without reading glasses on. Available in two sizes, No1& No2, for use both at home and on the go.

MAGNIFICATION

The sharp image size of your eye is about three times as big in SPEGELZOOM® (4,5 cm) as it is in your ordinary bathroom mirror (1,5cm). The magnification is 1,85 times, compared to the real size and can be compared with the the concept of "10X".

SMART & STYLISH

The new magnifying mirror helps women and men (presbyopians) getting visual aquity without their glasses on.

- With level surface it will easily attach to any smooth wall surface (hook&loop) and can easily be moved or taken down.
- Moveable to different places where the light is the best and a must to bring on the journey.
- Gives a magnifying complement ("10X") to the overall picture of your face, when attached on another mirror.
- The small pocket mirror has two reflecting sides – one is magnifying and the other is an regular mirror.
- Designed for function – an elegant planoconvex optically polished glass dome, easy to integrate with a wall mirror.

FACTS

Material	Optically polished planoconvex highly reflecting glass lens.
Wrapping	Travel pouch, transparent plastic box.
Pouch	Black microfiber of polishing quality, spring lock.
Fastening	No1 : Hook&loop-function; a loop disc is attached edge-to-edge, two hook discs of 50 mm in bulk. No2: If desired; hook&loop-function or temporary with a double suction cup
Size	No1 : 103/11 mm; No2: 80/7 mm.
Weight	No1 : 150 grams; No2: 75 grams.
